DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: In line 5, the words “outer mandrel” should be –outer sleeve--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Hendrickson et al (US 5,636,691).

The claimed structure reads exactly on the reference's structure when members (146), (154), (168), (12,14), (20), (142) and (56,112) of Hendrickson et al are considered as “outer sleeve”, “solids flowport”, “blast liner”, “service tool”, “flowbore” “flowspace” and “solids exit port” respectively as recited.

It is noted that since there is nothing that prevents the wear rings 168 from being rotated relative the outer sleeve 146, the wear rings 168 are therefore “rotatably retained” within the outer sleeve as recited.

Allowable Subject Matter

4. Claims 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 1-9 and 15-20 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
